

WEST MIDLANDS FOLK FEDERATION

BADGE MACHINE ARTWORK

The badge design is

- 53mm diameter
- the badge diameter is 58mm
- the cutting circle is 70mm diameter.

ADVICE

The outer edge of the circle is the actual badge size on the front but it is recommended you extend the background colour of the design to the cutting edge.

If you do not show the cutting circle guide on your artwork it is even more difficult to cut out the circles and make up the badges accurately.

Allow for a few mistakes and spoilt circles in your calculations of how many badges you need.

6 badges to an A4 sheet are the best fit for cutting out easily.

If you use card the badge machine will jam.
